Founded in 2016/2017 by Arnaud Doucet and Yann Nguema Anima Lux is a production company specializing in videomapping, immersive digital artworks and interactive installations that can be experienced beyond the screen, designed to provide the public with participatory experiences that provoke emotional vibrations.

For a brief moment, video mapping becomes the essential element for sublimating an event. Product launches, interactive space creation, immersive scenography, Anima Lux transforms a space and its perception by developing a poetic language on the cement of technology. With productions all over the world, Anima Lux continues to push back the frontiers of excellence in interactive digital mapping.

Coding to poetry is our motto
