Régie Générale:

Jérémie Gaston-Raoul Mail: jeremie.gastonraoul@free.fr; Tél: 06 75 36 84 71

STAGE: - Ideal opening: 9 metres

- Ideal depth: 10 metres

- Ideal height: 5/6 metres under perches

As the show has already been performed in non-dedicated venues, an adaptation of our stage conditions is possible (please consult us). To be provided by the venue:

VIDEO : ● Video is very important as it is the only thing to be seen during this show, which is performed in the dark and without an actor on stage. The company brings its own computers To be provided by the host venue: Video projector: mini 4000 Lumens + optics adapted to the screen + HDMI link between the VP and the control room (at the back of the seat) White projection screen on a frame at the back of the stage suspended 50cm from the floor X metres from the edge of the stage.

CONTROL: The video control is controlled from the company's computers. A 2m long control room must be installed behind the audience. As Lumen Texte is triggered by the audience's reactions, a control room is not an option. The control room must have internet access: wifi or wired or 4G smartphone relay.
