Project supported by « Le Cube - Centre d'art numérique »

III - Technical rider Installation "Human Likes"

Optimal conditions of realisation :

The installation is in interaction with the audience. The audience will be placed in front of the installation and should be lit up by projectors to optimize the face detection.

Best results are achieved when people gather in the detection field, looking at the screen at the same time. The people should be standing and moving around.

The installation Human Likes is suitable for all audiences

Mounting time : 90mn

Thank you for sending us technical informations of the venue

Hardware to provide by the venue :

1 / TECHNICAL TEAM TO PROVIDE

1 Technical manager during mounting of the installation

2 / ELECTRICAL
