

LES VOIX DU MADIDI

Iga Vandenhove & Knorke Leaf

Technical specifications/advice for use :

Mp4 video to be projected (could be on a white wall but also on other kind of wall. Once it was projected in Bolivia on an exterior wall from which some vegetation (cactuses) was hanging. At some point it was hard to tell if the cactuses were part of the video or not which gave a nice 3D or 4D effect and added to the purpose of the art piece : generating confusion). The sound is included in the video (better if broadcast in stereo)

Can also be viewed individually on a personal device (smartphone, computer, tablet...)
