The Grand Credits
Tech Rider & Aesthetical Instructions

Antoine Schmitt

----------- **Tech Rider**

-------- **Compatibility**

This is a Flash executable.
Compatible OS : Mac OSX >= 10.4 or Windows XP/Vista
Graphic card : minimum 1024x768, maximum 1440x1200

Use only on a computer with continuous internet access.

-------- **Technical Instructions**

Launch the executable (.app on Mac, .exe on Windows). ESC to quit.
Set up the computer so that it autostarts the executable, and so that it restarts after power failure.

----------- **Aesthetical Instructions**

-------- **Best Conditions**

- Cinema-like room without the seats
- Large screen area, above the eyes of the public ("the difference between cinema and television is that you look up to the movie screen and down to the TV screen" - Godard)
- some seats in the back

- computer (standard Mac or PC) with internet connection
- big beamer

-------- **Minimal conditions**

- TV or LCD screen
- computer (standard Mac or PC) with internet connection

-------- **In all cases**

- Setup the projection so that the text appears and disappears cleanly at the top/ bottom of the screen/wall.

- Choose the screen or videoprojector resolution that gives the best quality for the moving typography : so that the words that scroll flicker as little as possible and be of the best visual quality.

- Make various tests of resolution (1440x1200, 1024x768, etc...)

- Use the following keys on the keyboard to fine-tune :
    - Right and left arrow : position of the text
    - Up and down arrows : speed (change only if necessary)
    - + and - (plus and minus) : size of the characters

- Hide the computer. Only leave visible the image or screen.
