

# BEHIND THE DISH

**Specs:** 360 stereoscopic film top-bottom up to 8192 x 8192. Available in 5760 x 5760 H265 for Meta Quest 2. 3 x 12 minutes.

**Engineering:** 360 3D 8K VR film. Macro 3D custom camera rig.

---

**Minimum physical footprint:** a space to sit for 10 minutes (approx. 4 square feet per person).

**Installation details:** VR 360° video within a headset.

**Type of XR devices used:** VR headset, one controller, and ideally headphones. The controller is only used to start the experience, not during it.

As this is a non-interactive linear 360° film, the setup can remain basic.

- Past exhibitions have consisted of a set of rotating chairs and Meta Quest 2.
- We like to have the watching area separated from the gallery by black drapes so people feel more comfortable when wearing the VR headset.
- We display a trailer of the experience outside on a large screen
- We print the poster of the experience in a wide format.

In case of selection, an introductory call would be useful. Please reach out to [victor@targostories.com](mailto:victor@targostories.com)!

Thank you for your time.
